

## Introducing: English Language Arts and Mathematics “Shift Socials”

In times of increased demands and rapid change in education, teachers are trying to process the work ahead of them and understand how their practice will be impacted by the newly adopted Common Core Learning Standards. Please join us for an opportunity to break down and examine closely the *ELA and/or the Math Instructional Shifts*.

These sessions are designed to provide a review/overview of an instructional shift and, more importantly, provide participants with the opportunity to engage in a professional conversation about what that shift will look like as the Common Core Standards are taught in the classroom.

Come and join your fellow colleagues in a discussion about what the instructional shifts mean to them and let's get to the “core” of the ELA and/or Mathematical shifts together. **Through this collaboration, teachers will walk away with new ideas to implement in their classrooms immediately that support their ELA and/or Math instruction.**

*Participants should bring a copy of their grade appropriate math core standards and/or a nonfiction article/text that is relevant to their current curriculum as well as a laptop computer.*

Please Note: There will be a math and an ELA session happening simultaneously on each date. Participants should register accordingly.

### K-5 Teachers

Offered twice:

1/25/12 at Glenfield Elementary Library

2/2/12 at JLBOCES Conf.Rooms A&B

### 6-12 Teachers

Offered twice:

2/16/12 at JLBOCES Conf.Rooms A&B

3/7/12 at Glenfield Elementary Library

Time: 4:00-6:00 PM

Fee: None

### Facilitators:

Barabara Zehr and Jennifer Myers  
JLBOCES Curriculum Coordinators

To register: (315) 785-9143 or
